Art Unit: 2665

1. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

A. The reissue oath/declaration filed with this application is rejected as being defective because it failed to identify the foreign application on which foreign priority is being claimed as required by 37 CFR 1.63 (c). If the original patent contains a claim for foreign priority, such claim must be repeated in the reissue application in order to retain priority to the earlier effective filing date. MPEP 1417.

B. The reissue oath/declaration filed with this application is further rejected as being defective because the applicant(s) failed to submit a supplemental oath/declaration prior to allowance to cover any error corrected after the filing of all declarations currently in the reissue application. See 37 CFR 1.175(b)(1) and MPEP 1444.

2. In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 1-13 are rejected as being based upon a defective reissue oath/declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

“Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant.”

3. The disclosure is objected to because of the following informalities:

Art Unit: 2665

Any changes made to the patent by a **Certificate of Correction** dated prior to the filing of the reissue **must** be entered in the reissue application **without** bracketing or underlining..

Appropriate correction is required.

4. For formality, the applicant is advised to furnish a Form PTO-1449 including all references cited in U.S. Patent No. 6,381,233 B1 for proper consideration by the examiner.
5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lomp et al. '010 & '168, and Gilhousen et al. '806 & '361 are additionally cited to show the feature of CDMA communication system utilizing pilot code generation and modulators for pilot code modulation similar to the claimed invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (571)272-3146. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on (571)272-3155. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
